

# **EFA**

Adjustable Blade **Louvre** 

## **Description**

The EFA type louvres are designed for covering wall openings to the exterior.

### **Properteis**

The EFA type louvres are made from aluminium profiles. They prevent the entry of large particles in the air or animals, to the inside. They also prevent the entry of rain water to a certain extent.

The blades are made from curved profiles and are adjustable.

#### **Materials**

The frame and the blades are made from ETIAL-60 norm aluminium profiles.

#### **Surface Treatment**

After cleaning, the product is chromated and then painted with electrostatic powder paint to 20% gloss RAL 9010 (white) with a minimum thickness of  $60\mu$ . Other colours are available upon request.

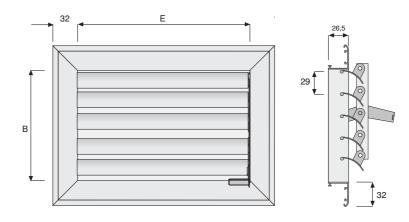

#### **Accessories**

Wire Mesh

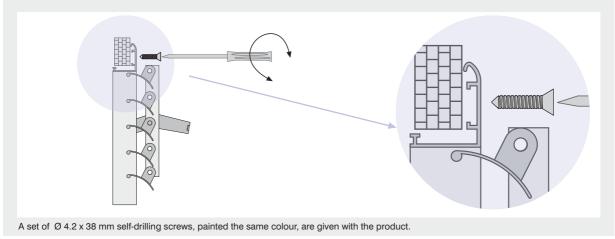

An expanded metal (aluminium) mesh, it prevents the entry of large flying particles and animals.

# Installation

# **Specification Text**

External louvre to protect the entry of large objects to the ducting system. The louvre will be made from ETIAL-60 norm aluminium profiles. The louvre blades will be adjustable and parallel-operated. The louvre will be cleaned and chromated, and painted with electrostatic powder paint to

the requested colour with a minimum thickness of  $60\mu$ . As an option, an aluminium expanded mesh will be placed behind the frame to prevent large flying objects and animals to pass through the blades.
