

BFB

Fan-coil Return And Access Door

Description

The BFB type grilles are designed for air transfer applications of return air, while providing the function of an access door for fan coil units. The access door opens and closes on a push-push action; ie. it locks on the first push and releases with the second push.

Properties

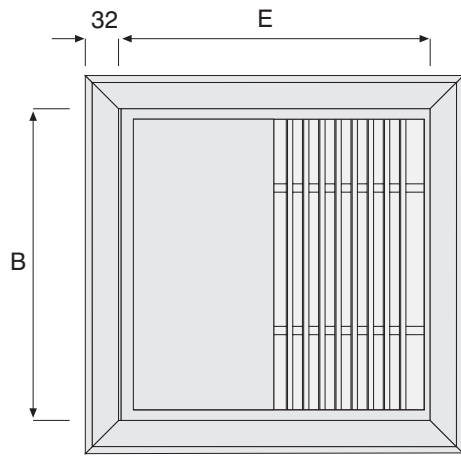

The BFB type grilles have a linear grille integrated with the opening cover plate inside the frame. Optionally, an air filter of washable synthetic fiber material can be installed behind the grille.

Materials

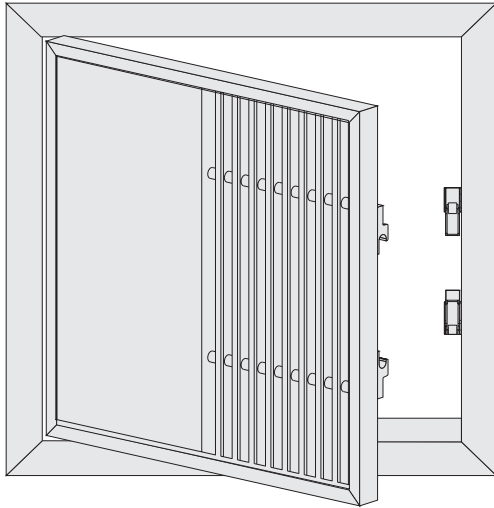

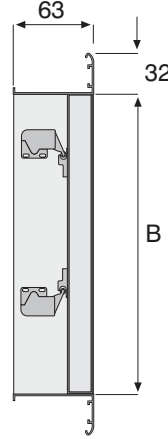

The frame and linear grille are manufactured from ETIAL-60 norm aluminium extruded profile, and the cover is made from ETIAL-5 norm aluminium sheet

Surface Treatment

The surfaces of the grilles are first cleaned, then treated with chromating process; after which, are painted electrostatically, with 20% gloss RAL 9010 (white) as standard. Other colours are also available upon request.
